Introduction

“Newswitch” is a website owned and operated by The Nikkan Kogyo Shimbun. We report our newspaper articles and original contents on this website, making industrial news in an easy-to-understand manner and approaching news from different perspectives.

To realize that, we pick up 17 timely themes for different categories such as “Business & Economy” “Technology” “Car / Railway / Airline”, and so on. Furthermore, our news reporters and outer industry experts will comment on the articles to add their view worth reading.

Main readers of this website are business people in their 20s to 40s who are responsible for the next generation and also the college students working towards the same path.

Newswitch was created with a focus on design. It is completely mobile-friendly. Also, we also aim to build communities through workshops or other events related to “Robot” or “Rikejo (working women in the fields of science and technology)” ,etc.

Newspaper companies like us, which are old media, stand at a crossroad. “Newswitch” would change and pursue the value of industrial information journal. Our challenge has only just begun. We pledge to continue growing as a media, listening sincerely to the voices of the people.

Our aim is to become “The most useful business website which is technical, clear and enjoyable”

We hope you will be looking forward to “Newswitch” from now.
